SANJAY RAM M

Chennai, Tamil Nadu, India | m.sanjayram07@gmail.com | 9789484684 | LinkedIn: sanjayram07 | GitHub: sanjayram-07

SUMMARY

Full Stack Developer skilled in building real-time web applications using Node.js, Express.js and React. Proficient in Data Structures & Algorithms with hands-on experience designing scalable backend systems, event-driven architectures, and AI-powered automation pipelines.

EDUCATION

Madras Institute of Technology Chennai Expected Graduation: 2028

B.E. in Computer Science and Engineering

- CGPA: 9.4/10 (Semester 3)

INTERNSHIP EXPERIENCE

AI & Automation Intern *Vasanth & Co, Chennai* 13 May 2026 – 13 Jun 2026

- Developed a RAG chatbot using LangChain integrated into the Vasanth & Co Point of Sale (POS) website.
- Built an n8n RAG assistant processing Google Drive docs, storing vector embeddings in Pinecone, and delivering responses via Gmail.
- Built an n8n pipeline to collect student details via a web form and auto-sync to Google Sheets in real time.
- Collaborated on system & database design for an Internal Task Management app for Vasanth & Co, Saidapet.

Software Development Intern *Knowillence* 6 Apr 2026 – 6 May 2026

- Migrated a Northwind MySQL-based website to MongoDB and deployed it as a live production project.

PROJECTS

CT Department Automation System *(React · Node.js · Express.js · Python · MongoDB)*

Role: Team Lead — Backend & Integration

- Led backend and integration of a dept-level academic portal; built a Python parser to extract Assessment 1 & 2 marks and attendance from staff-uploaded files.
- Built REST APIs with Node.js/Express.js exposing parsed academic data; integrated with a React frontend for real-time mark and attendance viewing.
- Coordinated a 5-branch Git workflow and managed cross-module integration between parser, backend, and frontend teams.

FitMon: AI Fitness Tracking System *(React · Node.js · MediaPipe · OpenCV · ESP8266 · Firestore)* Mar 2026

Dev's House 48-Hour Hackathon, VIT Chennai

- Built a real-time fitness tracker integrating computer vision, IoT hardware, and a full-stack web app within 48 hours.
- Developed a bicep curl form analyser using MediaPipe and OpenCV to detect joint angles and count reps with live posture feedback.
- Interfaced an ESP8266 with an FSR sensor to calculate exercise pressure for hardware-level rep validation alongside the CV model.
- Full-stack app built with React, Node.js/Express, and Firestore — displays live workout metrics, session history, and form scores.

PulseChat *(Node.js · Express.js · Socket.IO · JavaScript)*

- Built a WebSocket real-time chat server supporting 50+ concurrent users with zero HTTP polling overhead.
- Engineered a server-side user-to-socket registry routing 1:1 private messages to exact socket instances, eliminating unnecessary broadcasts.

ACTIVITIES AND ACHIEVEMENTS

Madras Institute of Technology Feb 2025

- Runner-Up, Rapid Web Development, MUTEX'25 Tech Symposium — Built an efficient web solution under strict time constraints.
- Runner-Up, Algorithm Blitz — TRIGGER Tech Symposium, Dept of Computer Technology; ranked among top competitors in an algorithm coding competition.

Leadership & Sports Achievements Jan 2024 – Nov 2024

- State-level athlete in 110m Hurdles and Long Jump — demonstrated discipline and competitive dedication.
- Pupil Leader, Annual Sports Meet — Organized a 500+ participant event, coordinating teams, march-past, and logistics.

CERTIFICATION

The Complete Full-Stack Web Development Bootcamp — Udemy (Dr. Angela Yu) Dec 2025

SKILLS

Languages: C, C++, Java, JavaScript, SQL
Technologies: HTML, CSS, React.js, Node.js, Express.js, Socket.IO, LangChain, n8n, Pinecone, MediaPipe, OpenCV
Tools: Git, GitHub, Git Bash (CLI), Postman, Visual Studio Code
Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS)
